Corrective Action	Authentication configuration corrected.
QA Result	User Account 1 — PASSED User Account 2 — PASSED Administrator — PASSED
Final Status	RESOLVED
Prepared By	Michael — Team Leader
Date	_____
Signature	_____

QA LOGIN TEST CHECKLIST

Tester: Christian — QA Tester

TEST CASE	EXPECTED RESULT	ACTUAL RESULT	STATUS
User Account 1	Login successful	_____	■ PASS ■ FAIL
User Account 2	Login successful	_____	■ PASS ■ FAIL
Administrator Account	Login successful	_____	■ PASS ■ FAIL
Login page loads	Page displays correctly	_____	■ PASS ■ FAIL
Authentication	Credentials accepted	_____	■ PASS ■ FAIL

Overall Result: ■ PASS ■ FAIL

Tester Signature: _____

Date: _____

IT SYSTEM STATUS

SYSTEM COMPONENT	STATUS	NOTES
Network / DNS	■ OPERATIONAL ■ ISSUE	_____
Application Server	■ OPERATIONAL ■ ISSUE	_____
Login Interface	■ OPERATIONAL ■ ISSUE	_____
Authentication	■ OPERATIONAL ■ ISSUE	_____
Overall System	■ OPERATIONAL ■ ISSUE	_____

NETWORK & DNS CHECK SHEET

John Mark — Network Administrator

TASK	STATUS / NOTES
Check network connectivity	■ DONE _____
Verify DNS status	■ DONE _____
Confirm connection stability	■ DONE _____
Record findings	■ DONE _____

Additional Notes:

APPLICATION SERVER CHECK SHEET

Justine — System Administrator

TASK	STATUS / NOTES
Check application server status	■ DONE _____
Verify server connectivity	■ DONE _____
Check for server-side errors	■ DONE _____
Record findings	■ DONE _____

Additional Notes:

LOGIN INTERFACE CHECK SHEET

Colline — UI/UX Designer

TASK	STATUS / NOTES
Open login page	■ DONE _____
Check page loading	■ DONE _____
Check layout/interface	■ DONE _____
Confirm whether UI causes the issue	■ DONE _____
Record findings	■ DONE _____

Additional Notes:

AUTHENTICATION TROUBLESHOOTING SHEET

Alexis — IT Technician / Harlie — Programmer (optional)

TASK	STATUS / NOTES
Test login request	■ DONE _____
Observe authentication response	■ DONE _____
Check authentication configuration	■ DONE _____
Apply correction	■ DONE _____
Retest login	■ DONE _____

Additional Notes:

TEAM INCIDENT SUMMARY

Prepared by Michael — Team Leader

STAGE	FINDING / ACTION
1. Client Report	Website loads, but users cannot log in.
2. Clarification	Authentication error occurs after credentials are submitted.
3. Investigation	Network/DNS, server, and UI checks show normal operation.
4. Technical Finding	Authentication process/configuration caused the issue.
5. Correction	Authentication configuration was corrected.
6. QA Testing	Multiple accounts successfully logged in.
7. Final Status	SYSTEM INCIDENT RESOLVED.

Michael — Formal Report Lines:

"Never has the application experienced this level of login failure during our previous tests."

"Only after checking the authentication process did we identify the source of the problem."

"Not only did we correct the authentication issue, but we also tested multiple user accounts."
